DX news

A25UK Botswana, update by G0VJG

The website will be fully running by tomorrow with our info. Due to solar minimum we have published some operating frequencies so people know where to expect us.

The journey is long so we expect to be on site and on the air late evening Tuesday 25th April.

We have gone to some lengths to favor the low bands with 4 square antennas for 30 and 40m, also verticals for 30 and 160m. We have two mobile trailer towers each with two beams for other bands. We hope to have two stations on the air all the time but have capability and man power to run 5 stations at once.

The team is made up of 10 UK hams and ZS6JR Daniel who has supplied the logistics and most of the equipment. QSL is via M0OXO Charles.
